

MISSISSIPPI STATE UNIVERSITY™
COLLEGE OF VETERINARY MEDICINE

Start your career in population medicine here...

Mississippi State University, College of Veterinary Medicine, Department of Pathobiology and Population Medicine, is soliciting applications for a 3-year residency in Population Medicine. This 3-year residency is an excellent opportunity for someone wishing to transition into an academic, public health, or industry position, while sharing their knowledge with some very talented veterinary students. The 3-year residency offers a lot of latitude in the direction one might take to earn a Master's degree and board certification in preventive medicine.

The 3-year residency will consist of didactic and clinical training designed to achieve specialty certification by the American College of Veterinary Preventive Medicine. Residents are expected to teach in the professional curriculum, participate in applied population medicine research, lead and publish the results of research projects, conduct field disease outbreak investigations, and participate in extension outreach activities. In particular, the resident will contribute to teaching in the College of Veterinary Medicine's 3rd year clinical rotation in population medicine. Along with a mentor, the resident will conduct applied research and clinical activities to improve the health and well-being of Mississippi's many animal populations, including animal shelters, cow-calf farms, cattle stocker operations, swine farms, catfish and other aquaculture production systems, poultry farms and wildlife. It is expected that the resident pursues and complete a Master's degree.

Qualifications: Candidates must have a DVM or equivalent degree from an AVMA-accredited college of veterinary medicine and be eligible for USDA accreditation and licensure in Mississippi. Veterinary practice experience is desirable, but not required.

To apply go to <http://explore.msujobs.msstate.edu/cw/en-us/job/505425?ApplicationSubSourceID=>

MSU is an equal opportunity employer, and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, or any other characteristic protected by law. We always welcome nominations and

applications from women, members of any minority group, and others who share our passion for building a diverse community that reflects the diversity in our student population.
